EDUCATION

Mahindra University

B.Tech Computer Science Engineering

Aug. 2023 – Present

CGPA: 7.0/10 (till 5th Semester)

Narayana College (IPE Board), Nallakunta

Intermediate

June 2021 – May 2023

95%

Narayana School (SSE Board), Shankarpally

10th Grade

May 2020 – June 2021

CGPA: 10/10

COURSEWORK

Courses: Operating Systems, Software Engineering, Data Structures & Algorithms

SKILLS

Languages: C/C++, TypeScript, JavaScript, Python, MySQL, MongoDB

Frameworks & Libraries: React.js, React Native, Node.js, Express.js, Tailwind CSS

Tools: Git/GitHub, Figma, VS Code

PROJECTS

Full Stack Notes Management Application | *React, TypeScript, TailwindCSS, Node.js, Express.js, MongoDB, JWT* Dec. 2025 – Jan. 2026

- Architected and developed a full-stack notes management application with a scalable, type-safe frontend using React and TypeScript, paired with a RESTful Node.js/Express.js backend
- Designed and integrated a MongoDB database schema for efficient note storage and retrieval, enabling seamless CRUD operations with clean, maintainable code
- Implemented secure user authentication and session management using JSON Web Tokens (JWT), ensuring protected access to personal notes
- Built a responsive, accessible UI with Tailwind CSS, translating wireframes into reusable components with optimised state management and consistent cross-device rendering
- Followed the complete software development lifecycle — from requirement analysis and system design through development, testing, and deployment

Timebomb — Time-Locked Social Media Platform | *React, TypeScript, TailwindCSS, Node.js, Express.js, MariaDB, JWT* 2025

- Built a full-stack social media platform where users create posts that remain locked until a user-defined timer expires, driving engagement through anticipation
- Developed a React and TypeScript frontend featuring a multi-step post creation wizard, real-time feed, profile management, messenger, and anonymous gossip mode
- Engineered a Node.js/Express REST API with JWT-based authentication, bcrypt password hashing, and a connection-pooled MariaDB driver for persistent storage
- Implemented a server-side polling mechanism that automatically reveals time-locked posts upon reaching their scheduled unlock time
- Designed a responsive, mobile-first UI with dark mode support, custom CSS animations, and a cohesive gradient design system using shadcn/ui components

EXPERIENCE

Competitive Programming Club | *Member*

Sept. 2023 – Present

Participate in algorithmic problem solving sessions and coding contests focused on data structures and competitive programming techniques

PRTU TS Government Portal | *UI/UX Contributor (Figma)*

2025

Designed Figma wireframes and user flows for a government portal serving teachers in Telangana
